

VIQUA Arros™ Gives You Time for More

The compact, versatile VIQUA Arros UV water treatment system streamlines installation, delivers optimized performance, and reduces maintenance hassles. Now, you have time for more... sales, satisfaction, and living.

Perfectly suited for your customers

Small home or cottage

Larger homes

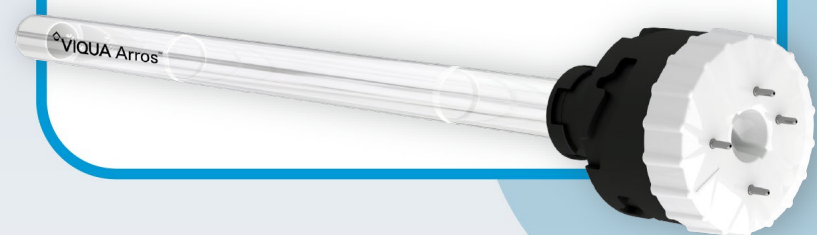

Light commercial applications

Designed by you. Engineered by VIQUA.

Lamp and quartz sleeve in a single component

Reduces installation and maintenance time

Ensures proper electrical component without requiring a lamp harness

PolyProtect™

Blocks UV light at the outlet, allowing for plumbing directly to PEX

Eliminates the need for hard pipes and elbows

Simplified mounting

Improves alignment of bracket and chamber

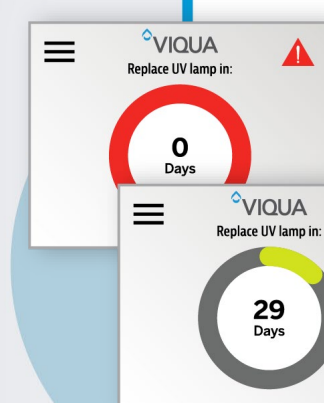

Accommodates water from either direction in plumbing

Stream™

Tracks the actual hours per day lamp is powered

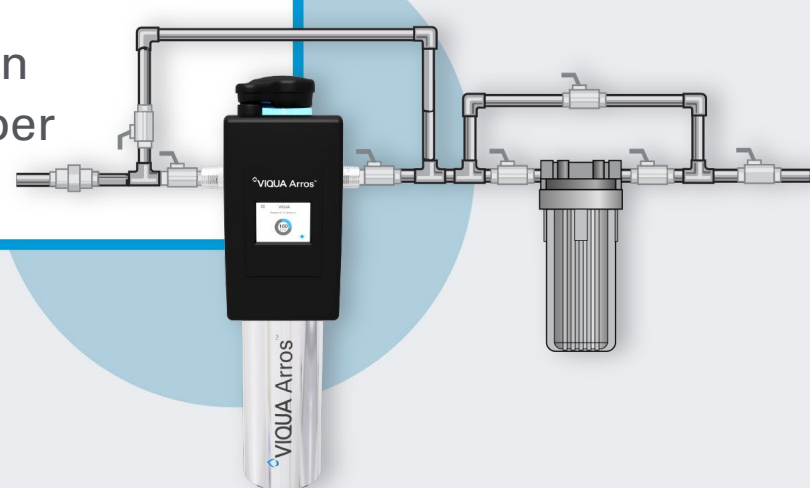

Enables timely lamp replacement for continued optimal performance

Tidal™ chamber

Reduces need for extra fitting and rerouting of plumbing

Increases dose dispersion within a smaller chamber

Integrated prefiltration

(available only on IHS units)

Removes commonly found particles in water through a sediment filter

Reduces unpleasant odors and color through a carbon block filter
